Trends & Innovations

Life Science Industry

Curida at a glance

The trusted partner. For better lives.

Curida
DIA TEC

International Biologics

- Curida Diatec is specialized on monoclonal antibodies for clinical and diagnostic use

Curida
EL VERUM

Small molecules formulations

- Liquid Pharmaceuticals based on sterile blow-fill-seal (BFS) technology and nasal spray
- Sterile and aseptic development and fill & finish

Ås produksjonslab
PART OF CURIDA

Other services

- Serve Norwegian pharmacies with raw materials and liquid products
- Manufacturing of special pharmaceuticals, cosmetics and nutrition¹

✓ **End-to-end CDMO** combining **biologic API** development and manufacturing capabilities with development of formulations and **sterile Fill & Finish** - creating significant customer value by **accelerating time to market** and **lowering overall risk**

Curida Diatec

State of the art biologic production facilities with significant capacity to increase volumes

Description

GMP/Clinical

Experience from therapeutic GMP manufacturing
Upgrading current processes at Forskningsparken
Preparing for 1-2 new therapeutic projects
In planning to build new GMP at Fornebu

Dagnostics

Serving global diagnostic test market with antibodies
Targeted investments to increase our market share
Expand production capacity and automation

Taking bio-molecule products to the market

Facilities overview

Oslo Science Park

Function: GMP API production

Area: 650m²

Annual capacity: 1,000 – 1,500g

Certification: cGMP (FDA in process)

Technopolis Fornebu

Function: ISO production, GMP QC

Area: 2500m²
ISO production area: 500m²

Annual capacity: 1,500 – 2,500g

Certification: ISO9001:2015
